HANUMANTHU SWATHI

B.Tech Information Technology Undergraduate | Software Engineer Intern | Full-Stack & Backend Development

Rajahmundry, Andhra Pradesh, India • +91 73827 40244 • hanumanthuswathi24@gmail.com

LinkedIn GitHub • Portfolio • GeeksforGeeks • HackerRank • CodeChef

PROFESSIONAL SUMMARY

Third-year B.Tech Information Technology student (CGPA 8.30/10, graduating 2027) with hands-on experience in full-stack development, backend engineering, and cloud computing using Java, Python, JavaScript, and AWS. Solved 150+ problems on LeetCode, GeeksforGeeks, and HackerRank, ranking 599th nationally in Unstop CodeClash 2025. Delivered four production-style applications covering REST APIs, database design, authentication, and AI integration. Seeking a Software Engineer Intern or SDE Intern role to build scalable backend and full-stack systems.

CODING PROFILES & PROBLEM SOLVING

- Solved 150+ Data Structures & Algorithms problems across LeetCode, GeeksforGeeks, and HackerRank, covering Arrays, Trees, Graphs, Dynamic Programming, and OOP design.
- Ranked 599th nationally in Unstop CodeClash 2025 and 163rd in Weekly Coding Challenge C3; qualified for Round 2 of EY Techathon and competed in TenzorX 2026 AI Hackathon and Flipkart Runway Season 5.

EXPERIENCE

Software Engineering Virtual Intern — Infosys Springboard — Python Track 2026

- Completed a competitive, industry-aligned Batch-1 selection covering 3 core areas: Python programming, data structures, and application development practices.

Cloud Engineering Intern — AWS, via APSSDC 2024

- Deployed and configured 6 AWS services — EC2, S3, IAM, Lambda, API Gateway, and DynamoDB — to support cloud-native, event-driven application workflows.
- Automated a serverless data pipeline connecting AWS Lambda, API Gateway, and DynamoDB, eliminating the need for a persistently running backend server.
- Secured cloud infrastructure by implementing least-privilege IAM roles and policies, and established CloudWatch monitoring for real-time resource health tracking.

PROJECTS

StudyCircle v2 — Real-Time Collaborative Learning Platform | Team Lead 2025 – Present

Next.js 15 · React 19 · TypeScript · Node.js · PostgreSQL · Socket.io · JWT/OAuth · Vercel · Render

- Architected a real-time collaborative study platform using Next.js, PostgreSQL, and Socket.io, enabling live study rooms and shared notes for concurrent B.Tech student sessions.
- Led a 3-member engineering team through system design, API development, and deployment on Vercel and Render, taking the platform from architecture to production.
- Secured the application with JWT/OAuth authentication and role-based access control, and built a progress-tracking dashboard for student engagement metrics.

DevMind AI — AI-Powered Software Engineering Workspace 2026

Angular · TypeScript · Spring Boot · Spring Security · MySQL · Google Gemini API · SSE

- Integrated the Google Gemini API into a Spring Boot backend to power 4 AI-driven capabilities: automated code review, bug detection, documentation generation, and test-case generation.
- Built asynchronous background job processing via Server-Sent Events and a real-time analytics dashboard, securing access with Spring Security authentication.

DocSpot — Doctor Appointment Booking Platform 2024

MongoDB · Express.js · React · Node.js

- Developed a full-stack MERN booking platform covering 3 core modules: provider search, appointment scheduling, and visit history management.
- Designed REST APIs and 2 normalized MongoDB data models (patient and provider) to support reliable appointment scheduling logic.

Developer Portfolio 2023

React · Next.js · Vercel

- Built and deployed a responsive portfolio site on Vercel showcasing 4 full-stack and cloud projects, technical skills, and achievements to recruiters.

TECHNICAL SKILLS

- Languages: Python, Java, JavaScript (ES6+), TypeScript, C++, SQL
- Frontend: React.js, Next.js, Angular, HTML5, CSS3, Responsive UI Design
- Backend: Node.js, Express.js, Spring Boot, Spring Security, REST API Development, Authentication & Authorization
- Cloud & DevOps: AWS (EC2, S3, IAM, Lambda, API Gateway, DynamoDB, CloudWatch), Git, GitHub, CI/CD Basics
- Databases: PostgreSQL, MySQL, MongoDB, DynamoDB (NoSQL), Database Design & Optimization
- Core CS: Data Structures & Algorithms, Object-Oriented Programming, System Design Basics, DBMS
- Developer Tools: VS Code, Linux CLI, Postman, Maven, npm, Vercel, Render

EDUCATION

B.Tech — Information Technology — Aditya College of Engineering & Technology (ACET), Surampalem, Andhra Pradesh Expected May 2027

- CGPA: 8.30 / 10.0 (3rd Year)
- Relevant Coursework: Data Structures & Algorithms, OOP, DBMS, Cloud Computing, Computer Networks, Operating Systems.

CERTIFICATIONS & ACHIEVEMENTS

- AWS Certified Cloud Practitioner
- HackerRank Certified — Python, SQL, and JavaScript
- Google Data Analytics Certificate
- NPTEL — Cloud Computing and Internet of Things (IoT)
